Highlighting Add-ons

Frappe Insights

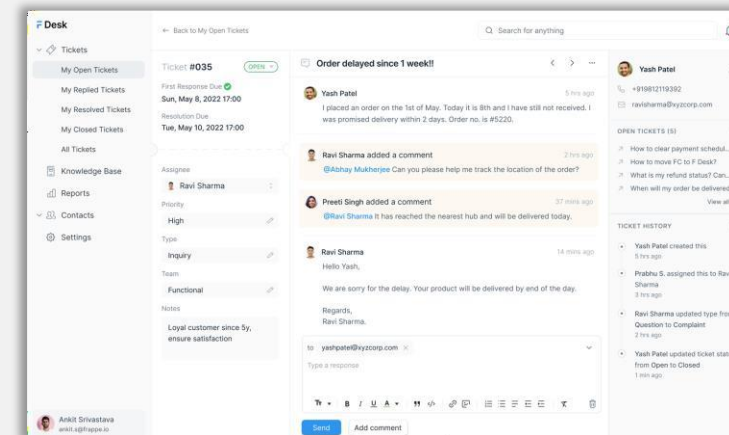

Frappe Insights simplifies data analysis for non-technical users, filling the gap in the framework by providing an accessible solution to analyze and visualize structured data without developer expertise.

Gameplan – Internal Chat

Gameplan a easy communication app, simplifies remote team communication through categorized, asynchronous discussions and integrates knowledge capture into project and team documentation.

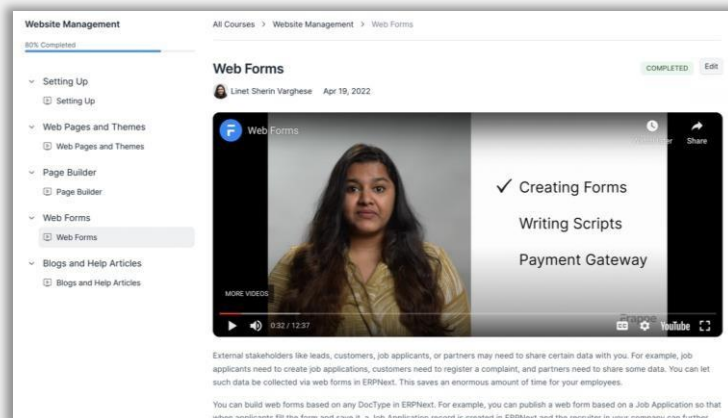

Helpdesk

Frappe Helpdesk equips you with the necessary tools for efficient and meaningful customer interactions, ensuring customer satisfaction.

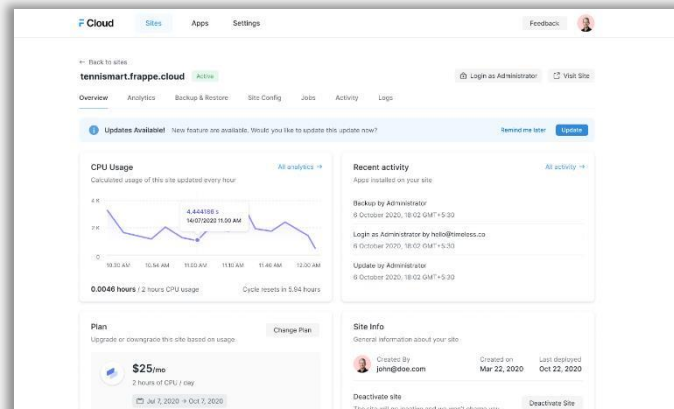

Highlighting Add-ons

Frappe LMS

Frappe LMS is an open-source Learning Management System with a user-friendly interface, prioritizing a clean and simple user experience for enhanced learning.

Frappe Cloud

Frappe Cloud eliminates server procurement and setup hassles, allowing you to concentrate on your business goals.

Frappe Cloud

Benefits	Self Hosted Eg. AWS, Digital Ocean	Frappe Cloud
Easy & Faster Deployment	✗ Install and deploy with Linux Shell	✓ UI based containerized deployments
Automated Upgrades to Frappe Apps	✗ No (Manual)	✓ Yes, easy and assisted upgrades
Automated Backup and recovery	✗ No (Manual and error prone)	✓ Automated backups and recovery
Automated Logs and monitoring	✗ Manual configuration	✓ Automated and always on
Centralized database for multi-tenant deployments	✗ No	✓ Yes
Centralized access control	✗ No	✓ Yes, Team level permissions and key based SSH access control
Best practices and pre-configures DevOps	✗ You setup your own devops practices	✓ Preconfigured best practices
Frappe Commissions		✓ Frappe

Frappe Dedicated Support

Product Warranty

This includes warranty for replicable bugs for supported features (as per the product manual) for a given version. The resolution time will depend on the severity of the bug reported.

Infrastructure Support

This includes end to end support for hosting ERPNext in customer environments which includes deployments, updates, scalability support, [availability support](#), [compliance support](#) and integration support.

Large DB Support
